Well, well, well, I just got invited to be a speaker at this workshop. Of course, as I write this, I wonder if you'll ever get this email as I wonder if you'll ever go back to work...

It's not on the events page, but the last I heard from the ChemIG call, it was moving forward. If you need a contact, I can probably figure out who is in charge.

Hey again! I never heard any information from the meeting organizers. Do you know if this meeting has been finalized? I'd definitely be interested in presenting and/or attending!

Thanks.

Jamie

CIG is SETAC's Chemistry Interest Group. FTM is a focused topic meeting. I don't have any other information about the meeting, but Katie might since she talked with Mark Johnson. I'll forward your suggested list of contacts to Katie. Thank you!

Sure. Could you tell me a tiny bit more about the workshop...what's CIG and what's FTM?

There will be a full-day session on PFASs at SETAC this year. Robert Buck from Chemours and I will be co-chairing the first session and Carrie McDonough (postdoc in Chris Higgins's lab) will be co-chairing the second. I also suggest Susanne Brander from OSU (ecotox), Mark Miller from US EPA (if he'll be at SETAC), and I can probably give you a list of others once I see the SETAC attendee list.

Would you guys be interested in participating? And would you have others to recommend? Either let Katie or I know.

Thanks!

**To:**  
**Subject:** SETAC PFAS FTM/Workshop

Hi CIG members,

I spoke with Mark Johnson on the phone Friday regarding his proposed SETAC PFAS combined FTM/Workshop to see how the CIG could be of support or be involved.

A quick summary of the proposed FTM/Workshop: They plan to have 2.5 days of presentations on PFAS, followed by a workshop to address questions that arise. The workshop will consist of five different groups (chemistry, exposure, ecotoxicology, human toxicology, risk characterization) comprised of experts in each of these areas who will work together to answer these questions in the form of a peer-reviewed manuscript. The current plan is to hold this meeting in the spring or summer of 2019.

Mark told me that they would be really interested in any "experts" in our group who would be interested in participating, or would be really grateful for any recommendations we could make, as they are still looking to fill lots of the workshop spaces.

If anyone would be interested in participating or has a recommendation of someone who would be a good fit, please send me their name, affiliation, and area of expertise, and I will send the info on to Mark. He or the group chairs will then reach out to people to discuss the workshop.

I will also ask to see if there are any recommendations on our next call, but if you think of someone before then please go ahead and e-mail me.

Thanks,

Katie
